Skills

Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, ReactJS, Next.js

Core Concepts: State Management, Component Architecture, RESTful API Design, Responsive Web Design

Styling: Tailwind CSS

Backend: Express.js (RESTful APIs), Prisma ORM, MongoDB

Tools & Platforms: Git, GitHub, Vercel, Supabase, VS Code, Postman

Work Experience

Ethnotech Academy — Full Stack Developer Intern (Offline)

Feb 2026 – Mar 2026

- Completed an offline, hands-on internship focused on **full stack web development** practices and industry-standard development workflows.
- Built **RESTful APIs** using **Express.js**, including route design, middleware, and structured error handling, while using **Prisma ORM** and **MongoDB** for schema design and data management.
- Strengthened understanding of backend architecture, authentication flows, and end-to-end integration between frontend and backend systems.

Projects

URL Shortener

[\[GitHub\]](#) [\[Live Demo\]](#)

- Developed a full stack URL shortener using **Vite + TypeScript** on the frontend, with **Supabase** as the backend for data storage and **Supabase Auth** for secure user authentication and session management.
- Built a redirect service that resolves shortened links to their original destination, along with a dashboard for users to generate, manage, and track their links.

Readme-Git

[\[GitHub\]](#) [\[Live Demo\]](#)

- Built a GitHub README generator using **Next.js (TypeScript)**, **Tailwind CSS** and **Zustand - State Management**, offering multiple design templates – **Classic, Cyberpunk, Terminal, and Modern** – inspired by [\[Git Story\]](#).
- Added a live preview interface so users can instantly see formatting changes while filling in project details, then export ready-to-use Markdown, helping developers create polished READMEs in minutes.

Education

MIT Degree College, Mysore – Bachelor of Computer Applications (BCA)

2023 – 2026

CGPA: 8.9/10

- **Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms, Computer Networks, Operating Systems, Cloud Computing, Computer Multimedia and Animation, Mathematics, Database Management Systems, Software Engineering.
- Maintained a strong academic record while actively building and shipping personal full stack projects alongside coursework.

Certificates

- **Meta Front-End Developer Certificate** (Coursera) [\[View Certificate\]](#)

Covered core front-end concepts including HTML, CSS, JavaScript, React, and UI/UX design principles.

- **Backend Development** (Udemy – Hitesh Choudhary & Piyush Garg) [\[View Certificate\]](#)

Covered backend fundamentals including Node.js, Express.js, RESTful API design, and database integration.

Achievements

- Secured **1st Place** in the Internship Hackathon by building a **MERN Stack Job Hiring Platform** within a limited time frame, competing against multiple teams.
- Collaborated with a team to design, build, and deploy multiple full stack projects end-to-end, from database design to production deployment.

Hobbies

Coding • Listening to Music • Watching Movies
